

Hormonal IUD Access Group evolved structure January 2022

**Note: This overall structure could be transitioned or updated as the global landscape evolves, including as SEMA is launched*

1

Steering Committee

Donor and procurer decision-making group tasked with developing and monitoring implementation of the overall global targeted, phased strategy to expand access to hormonal IUD and strengthen hormonal IUD market. Group identifies and mitigate risks in market health, maintains relationships with suppliers, reviews global commodity forecasting and disseminates regular communications.

2

Partners Exchange

Group where countries, suppliers, partners, procurers and donors meet to exchange updates on country interest and progress with hormonal IUD introduction, collaborate to develop and disseminate resources to support introductions/roll-out, share lessons learned across organizations/programs and discuss technical topics relevant to hormonal IUD rollout.

3

Operations Group

Donor and procurer working group that supports Steering Committee decision-making. Group supports monitoring of market health, development of communications, review of country needs, and supports goals of Steering Committee and Partners Exchange meetings.

2022 Steering Committee membership, schedule and activities

1

Steering Committee

2022 Membership

Standing decision-making members: FCDO, USAID, UNFPA, BMGF, Country Representatives (2)*
 Standing supporting, non-decision-making members: GHSC-PSM, CHAI**, FHI 360**, SEMA***, CPG/GFPVAN****
 Suppliers (Bayer, Medicines360, Others-TBD) participate by invitation if relevant topics arise

*Country government representatives from countries currently introducing hormonal IUD

**Shared secretariat role for 2022

***Ensure appropriate linkages as global landscape evolves

****Ensure holistic view of supply to facilitate donor/procurer decision-making at strategic level as architecture is moving towards platform that is multiproduct

2022 Meeting schedule

Quarterly remote meetings; suggest that donors cost-share meetings or rotate hosting any in-person meetings

2022 Activities

- Refine strategy as needed, including aligning on next steps and feasible timelines for implementing a total market strategy
- Work to ensure long-term health of market including affordable pricing and adequate supply to meet demand; additional workstreams to support this as needed
- Track 2022 funding availability for commodity procurement
- Track 2022 funding availability for method introduction activities/TA
- Support dissemination and implementation of global learning agenda
- Monitor progress of hormonal IUD introductions
- Monitor annual global commodity forecast and incoming commodity orders; support prioritization of orders as needed; review updated global commodity forecasts
- Ensure key information is disseminated to broader FP community including research results from pilot activities and updates about evolving landscape on supply- and demand-sides
- Coordinate with suppliers
 - Suppliers provide updates on status of product supply and manufacturing capacity; procurers to share appropriate information on country needs
 - Discuss relevant information on issues regarding implementation and service delivery
 - Work to address any relevant bottlenecks related to supply and supply chain issues

2022 Partners Exchange membership, schedule and activities

2

Partners Exchange
